*Allowance*

1. Claims 1-30 are allowed.

2. The following is an examiners statement of reasons for allowance:

The prior art references most closely resembling the Applicant's claimed invention are Underwood (U.S. 6,704,873) and Sikdar (U.S. 5,916,305).

Underwood discloses A wide area network, separate from the internet, is coupled to each of the gateways for providing communication between the wide are network and the internet. However Underwood fails to disclose, "when the specific identifying indicia is determined to not be present, preventing recording of the Internet Protocol header source address for each of the packets of the file; and when the specific identifying indicia is determined to be present". These limitations are incorporated in all the independent claims (1, 7, 10, 11, 14, 17, 20, 22, 27).

Sikdar discloses, "The predictive parser updates a parser stack according to the value from the parser table and the current value of the parser stack. The parser table indicates which offset, value pairs are associated with the end of the data packet or other portion of interest. When the end is reached, the parser stack indicates whether the data packet matched the network protocol definition". However Jones fails to disclose, "when the specific identifying indicia is determined to not be present, preventing recording of the Internet Protocol header source address for each of

the packets of the file; and when the specific identifying indicia is determined to be present”.

These limitations are incorporated in all the independent claims (1, 7, 10, 11, 14, 17, 20, 22, 27).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement for Reasons for Allowance”
